

# *Maritime Ammonia Workshop*

Annual AEA Members Conference - Boston

*Optimising Value from the Mapping of Maritime Projects*

# Agenda

Workshop start – Welcome •————• 5 min

Maritime Projects Mapping – Initiating the work •————• 10 min

*An introduction to the origins and ongoing work to map and consolidate publicly available information regarding maritime ammonia projects.*

Early Results – Examples of outcome •————• 10 min

*Initial outcome – graphs, the thought process and any limitations.*

Exercise : •————• 60 min

*Facilitated exploration of the participants views on how best the mapping can provide value, using the following three framing questions:*

- *What information can we provide that represents a valuable tool toward your business development activity?*
- *What is the user case for the information we gather – who ultimately is the information for?*
- *How can such a mapping help you find directions with regards to future partners or regions?*

Capture Consolidate and Closeout •————• 30 min

# Mapping Maritime Projects

## Initiating – The first step

**AMMONIA ENERGY ASSOCIATION**

Section 1 of 10

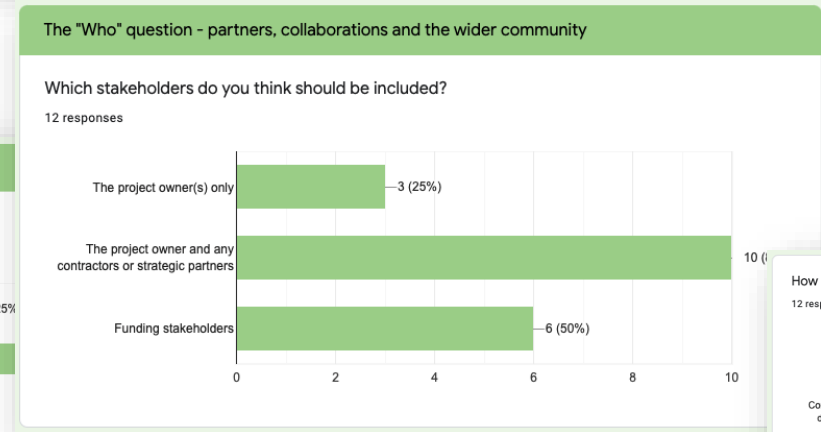

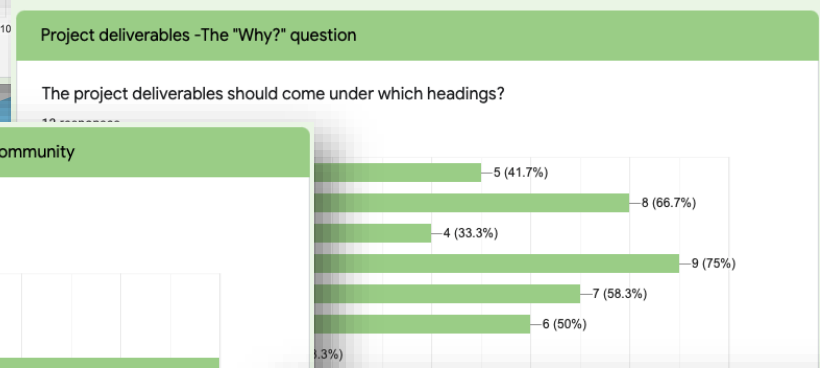

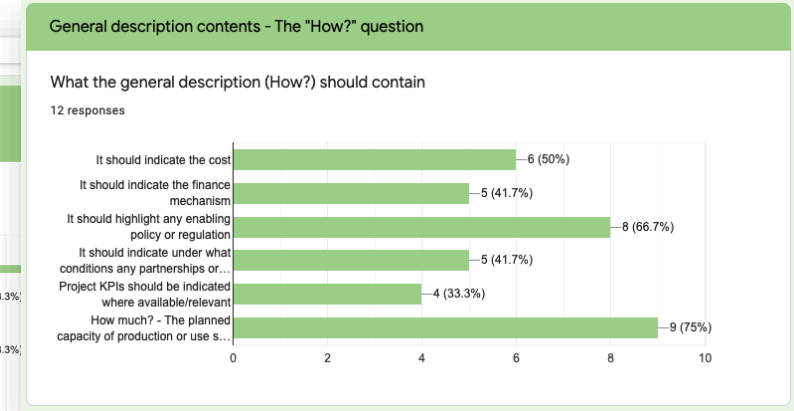

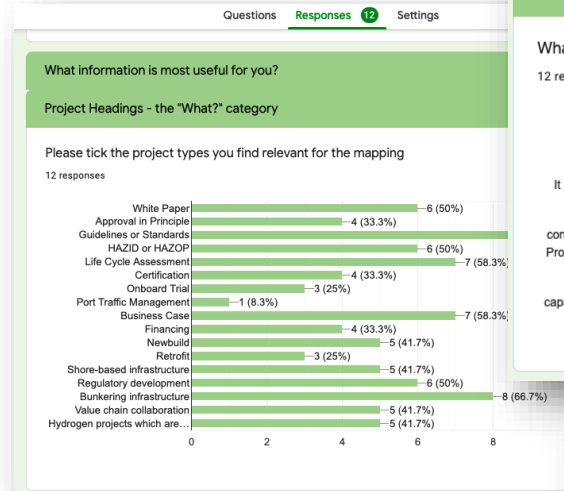

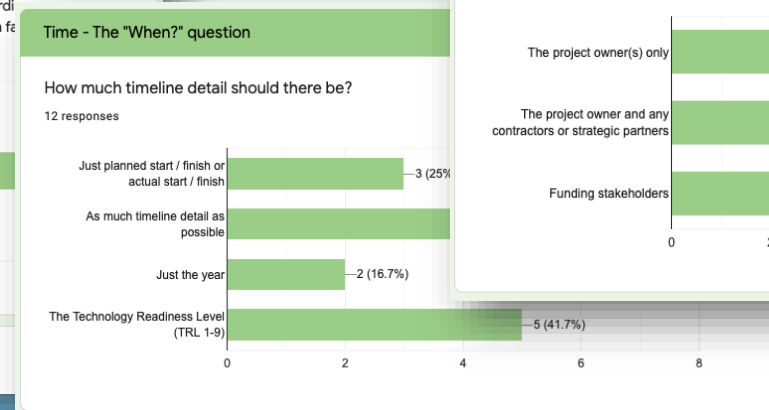

### Step 1 - MARITIME PROJECTS MAPPING - MEMBERS SURVEY

The AEA Maritime Committee are mapping maritime/-related ammonia energy projects. We need your assistance with defining the boundaries of that exercise and ensuring the map is complete.

# Agenda

Workshop start – Welcome •————• 5 min

Maritime Projects Mapping – Initiating the work •————• 10 min

*An introduction to the origins and ongoing work to map and consolidate publicly available information regarding maritime ammonia projects.*

➡ Early Results – Examples of outcome •————• 10 min

*Initial outcome – graphs, the thought process and any limitations.*

Exercise : •————• 60 min

*Facilitated exploration of the participants views on how best the mapping can provide value, using the following three framing questions:*

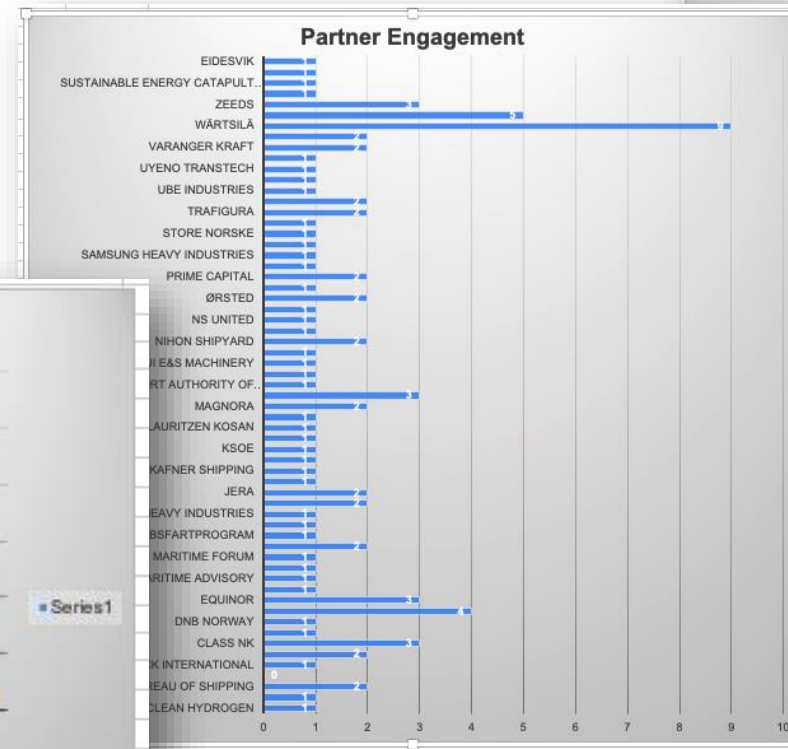

- *What information can we provide that represents a valuable tool toward your business development activity?*
- *What is the user case for the information we gather – who ultimately is the information for?*
- *How can such a mapping help you find directions with regards to future partners or regions?*

Capture Consolidate and Closeout •————• 30 min

# Mapping Maritime Projects

## *Examples of outcomes - Graphs*

- 50 projects have been mapped, work in progress to include further
- Experimentation has begun with graph design and composition
- Tagging and data organisation not finalised

# Norway and Denmark have high representation of projects

## EXAMPLES

### Norway:

- Scaling through regional synergies
- Land-based and offshore wind-to-hydrogen
- Bunkering infrastructure
- Offshore Supply Vessels
- Dedicated route ammonia carriers

### Denmark:

- Leading engine development
- Catalysing through consortia projects

# Korea, Japan and Singapore have high representation of projects

## EXAMPLES

### Japan:

- Ammonia energy supply infrastructure
- Vessel trials

### Korea:

- Vessel trials
- Research

### Singapore:

- Ship-to-ship bunkering
- Research

# Mapping Maritime Projects

## *Outcomes – Further thinking*

- Experimentation has begun with other data sub sets with focus on particular aspects such as vessel details and timelines
- AEA staff are using their judgement on what data sets provide value
- Annual conference presents unique opportunity for membership referral
- Focus needs to rest upon real value creation

# Agenda

Workshop start – Welcome •————• 5 min

Maritime Projects Mapping – Initiating the work •————• 10 min

*An introduction to the origins and ongoing work to map and consolidate publicly available information regarding maritime ammonia projects.*

Early Results – Examples of outcome •————• 10 min

*Initial outcome – graphs, the thought process and any limitations.*

➡ Exercise : •————• 60 min

*Facilitated exploration of the participants views on how best the mapping can provide value, using the following three framing questions:*

- *What information can we provide that represents a valuable tool toward your business development activity?*
- *What is the user case for the information we gather – who ultimately is the information for?*
- *How can such a mapping help you find directions with regards to future partners or regions?*

Capture Consolidate and Closeout •————• 30 min

# Exercise – How do we optimise the value created from the mapping of maritime ammonia projects?

We divide up into 3 teams to answer 3 framing questions

- *Process : Your team will take 20 minutes discussing a question and recording answers, before moving on to the next question. Some headings are provided to assist with structuring your answers.*

## **Question 1 –**

*What information can we provide that represents a valuable tool toward your business development activity?*

*Prepared headings:  
Location/Investment/  
Timelines/Project category,  
Trade route/Ship type,  
others*

20 min

## **Question 2 –**

*What is the user case for the information we gather – who ultimately is the information for?*

*Prepared headings:  
Legislators- why?,  
Finance- why?,  
Potential partners- why?*

20 min

## **Question 3 –**

*How can such a mapping help you find directions with regards to future partners or regions?*

*Prepared headings:  
Underpinning business case  
development/ identifying future  
partners/ identifying regions for  
focus/ identification of where  
you should promote your  
visibility within the sector*

20 min

# Methodology

The exercise is designed to address the question as comprehensively as possible by approaching it from different perspectives.

Sometimes it can be difficult to avoid repeating answers between the framing questions. It can also seem that additional framing questions should be asked. These kinds of challenges are part of the process and perfectly acceptable.

What is most important is to “juice” the question as much as possible in the time available while staying generally within the bounds of the exercise.

# Agenda

- *What information can we provide that represents a valuable tool toward your business development activity?*
- *What is the user case for the information we gather – who ultimately is the information for?*
- *How can such a mapping help you find directions with regards to future partners or regions?*

Capture Consolidate and Closeout •————• 30 min

# Capture, Consolidate and Closeout

30 min

## **Capture—**

*We will capture the answers, question by question, using the team that dealt with that question last. Each team may nominate one spokesperson if they wish.*

*What are the additional headings, what suggestions come under each heading?*

## **Consolidate—**

*It's important to boil down what we have produced so far.*

*-Remove repetitions and agree a structure to the answers perhaps different to that provided through the framing questions.*

*-Any special comments or insights derived from the exercise?*

## **Close out—**

*Discussion of the next steps*

*What kind of timeline for the mapping exercise is reasonable*

*What further referral process with members is appropriate?*

*How should the AEA use the information externally and internally?*

*Should some information be AEA member only.*

*What is the appetite for answering detailed surveys*

*What obviously should not be included in the mapping exercise?*

# Thank you!
